

# You Do Something To Me

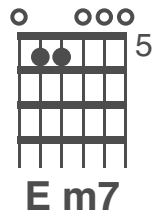

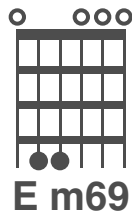

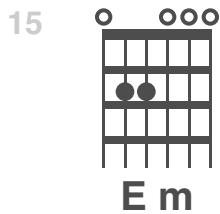

6 String Guitar Tuning: EADGBE

As mentioned in the video there are different ways you can play the Bm, below you will find the variations. At beginning of chorus, you can either play C7/G or C7. See if you can work out when the intro is used in verses, ie when he sings "you do something to me, something deep inside" does he then play intro before singing next verse ? Working these things out really improves your ability to memorise songs.

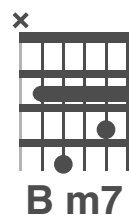

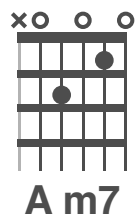

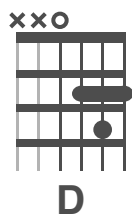

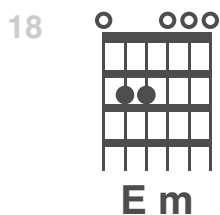

## Chords Used
